Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 20-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because the scope of the phrase "effective amount" is not known.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 39 is rejected under 35 U.S.C. 102(b) as being anticipated by Ingram (U.S. Pat. No. 6,130,076).

Ingram teaches the production of ethanol using ethanol producing bacteria (col. 2, lines 55-59) and a yeast autolysate based medium that includes magnesium. Example 2 discloses the importance of magnesium in the production of ethanol.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Geneix et al. (U.S. Pat. No. 4,765,992)(hereinafter Geneix) in light of applicants' admissions for the reasons set forth in the last Office Action.

***Response to Arguments***

Applicant's arguments filed 09/10/02 have been fully considered but they are not persuasive. Applicants argue that there is no motivation to combine the prior art teachings. Applicants state that it is well known to add certain minerals because, in their absence, "it can lead to sub-optimal, even incomplete fermentations, problems with head retention and yeast flocculence" and lower ethanol production. Therefore it would have been obvious to those of ordinary skill in the art to combine the minerals, referred to by applicants as be well known and used in the brewing arts with the yeast cells of Geneix in order to obtain more successful fermentations. Further, combining materials, or additives for their art recognized function and said additives do perform their art recognized function is obvious. *In re Kerkhoven*, 205 U.S.P.Q. 1069; *In re Castner*, 186 U.S.P.Q. 213. Also see MPEP 2144.06.

Art Unit: 1761

Applicants also argue that the claimed invention provides for superior results. The standard for overcoming a *prima facie* case of obviousness is "unexpected results," which applicants have the burden of showing.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
